MEMORANDUM FOR: Legislative Counsel

SUBJECT: Working Relationship Between the Agency
and Library of Congress

REFERENCE: Your MOR dated 25 Apr 75; same subject

George.

1. I read with interest your referenced memorandum. As to Mr. Raiford's request and [] action thereon, the requester stated that the Library of Congress was gathering data on USIB for members of the Senate Select Committee. Since I had already passed the data to the Committee and had no outstanding requests for additional material, and since this was the second time the Library of Congress seemed to be responding to individual members' requests (I suspect their staff initiated the calls to the Library), I conferred with [] about the dual approach to data.

STAT

2. [] agreed that we should not refer material to the Library of Congress if such material were for the Senate Select Committee members and that he would act as the channel for all such requests. We therefore advised Raiford that unless it could be made clearer that the requester was not on the Senate Select Committee, we would be unable to comply with his request. [] had been advised that if the requester was on any other Committee that the Select Committee Coordinating Staff here was the improper channel to deal with the matter and [] acted accordingly.
